

## THE SNOW CATCHER

In the open spaces where the wind blows and the snow blows one finds an abundance of snow catchers along the inter-state highways to help catch some of the snow in the winter time. The catchers help keep the inter-state open and the traffic flowing. When the snow is heavy and the wind strong the snow catcher can't hold all the snow back; therefore the inter-state is shut down and traffic comes to a halt.

In many ways life is like the open spaces. We are free to roam around going from place to place, doing this and that when suddenly the winds of life come and like the snow catcher along the inter-state our worries and troubles start to pile up. We find our self-anxious, irritable, restless and discontent. We long for better times, a smoother path and the open road. If we have built storm catcher's in our life through prayer and relationship with God and others we find the path bearable to travel. The STORM CATHCER worked as promised...My Grace is sufficient, says the LORD

If you have not started building a storm catcher at this time, now would be a good time to start building. It might just help you with the next storm.

Blessings,  
Deacon Len
